

## We're committed to keeping you healthy.

Consistent with CDC recommendations, we are intensifying our usual, thorough cleaning procedures around doors, handrails, vertical transportation and other public areas using sanitizing and disinfectant formulas recommended by the CDC, with cleaning/sanitizing taking place throughout the day.

- Encouraging social distancing practices in the common area, including in elevators, on escalators, and restrooms.
- Using sanitizing and disinfectant formulas recommended by the CDC.
- Cleaning and disinfecting entrance door handles, handrails and restrooms throughout the day.
- Ensuring all cleaning staff always wear masks and gloves.
- We are urging all employees and contractors to follow CDC guidelines, perform wellness checks and encourage those who are ill to stay home.
- Advanced air sanitizing solutions include the use of hospital grade air filters throughout our properties in addition to our already high-quality HVAC systems, which provide the highest level of air filtration available.
- The addition of Electrostatic Sprayers now enables superior distribution of EPA-approved disinfectants even in hard-to-reach places.
- Round-the-clock professional security staff now focus on promoting social distancing and discouraging gathering, as well as encouraging mask-wearing.

### Here's what you can do:

- Follow the [CDC's advice](#) for preventative behaviors.
- Stay home if sick.
- Please practice social distancing, remaining at least six feet apart from other shoppers.
- Do not shake hands or engage in any unnecessary physical contact.
- If you are feeling sick, have a cough, fever, or among other things, shortness of breath, or have tested positive or come in contact with someone who has tested positive for COVID-19, please do not enter the premises, limit contact with others and seek appropriate medical care.
- Wash your hands for 20 seconds with soap and warm water, or use an alcohol-based sanitizing gel, especially after you cough or sneeze.
- Try to stay in good general health: get plenty of sleep, be physically active, manage your stress, drink plenty of fluids, and eat nutritious food.
- Cover your nose and mouth with a tissue when you cough or sneeze. Throw the tissue in the trash after you use it. Please use your elbow if tissue is not available.
- Do not touch your eyes, nose, or mouth.
- If possible, use touchless payment (pay without touching money, a card, or a keypad). If you must handle money, a card, or use a keypad, use hand sanitizer immediately after.

We continue to closely follow this situation and will provide updates as needed. In the meantime, please be assured we are taking all recommended actions to promote a welcoming and healthy shopping environment.
